## ABOUT ME

Monique Schröder was born in Berlin and noticed at an early age that the sporty urge to move shaped her everyday life. This brought her first to the young ensemble of the Friedrichstadt-Palast (2009) and later, at the age of seven, to gymnastics. In gymnastics she created the foundations for the State School of Artistry in Berlin, to which she applied at the age of eleven (2013) and was successfully accepted. Since then it was clear to her: "I will make my passion my profession". Monique made friends relatively quickly with her current prop the gymball.

After nine years of training, which taught her basics of aerial, acrobatics, dancing and acting, Monique graduated in 2022, with top marks and began to turn her desire into reality. From this time forward she has been on the stages of the world and enjoys her path to the fullest.
